- 3+ years in Java, C#, React, and Python.
- 2+ years of SQL
- 1 year of Siemens PLC

Projects

Game Development: Created a 3D Platformer adventure using C# while interacting with your environment and solving puzzles to collect them. This was a solo project done with a time limit of one month.

Web Programming: Created a self-hosted resume builder and editor using local LLM to streamline the process by training it on a dataset of professional resumes put together by lead recruiters. This was done to help give those struggling a push towards making themselves stand out.
